

## CORPORATE SOLUTIONS POLICY

### Corporate Solutions Subscription Terms

The Terms and Conditions of Service applicable for Corporate Solutions are inherited from the Terms and Conditions of Service applicable for Web Site and Portal Development; and Web Presence Services. This includes Acceptable Use Policies respective to Web Site and Portal solutions and End User License Agreements (EULA) respective to Web Presence Services.

For more information on the relationship between this Policy and the associative statements, please contact [corpsolutions@bosatechnologies.com](mailto:corpsolutions@bosatechnologies.com). However, the Terms and Conditions of Service for Corporate Solutions are subject to the following rules:

1. Our dealings with any third party provider for any product or service with respect to Corporate Solutions are subject to our General Operational Policy.
2. We are not subject to policies posted for products acquired for our clients from third party providers. All posted policies are applicable directly to our clients.
3. We are not subject to policies posted for services powered by third parties except such party is in partnership with Bosa Technologies Enterprises. Otherwise, posted policies are applicable directly to our clients.
4. For Web Site and Portal Development, Acceptable Use Policies may be defined to protect the rights of the owner. This service may entail development of several Web Sites and/or Portals and different Acceptable Use Policies may be defined. These policies are independent of each other. However, where two or more Web Sites or Portals host each other, the Acceptable Use Policies of the Host supersedes that of the Sub Site or Portal Application where a conflict in policies arises in order of precedence.
5. For Web Presence Services, EULA may be defined only where a Bosa Technologies Product Supports the service. The EULA is defined separately for each service supported by a Bosa Technologies Product. Where a domain name or domain name service operates an EULA related to that of another domain name or domain name service, the EULA of the Parent domain name, link, web server, IP address or network supersedes the other in order of precedence.
